

**RESOLUTION NO. 2018-10**

**A RESOLUTION TO AUTHORIZE PURCHASE OF SECURITY DOOR ACCESS CONTROL LOCKS AND SOFTWARE FOR THE POLICE DEPARTMENT**

**WHEREAS**, the security door locking systems for the Police Department have become obsolete and are failing, replacement parts and hardware/software upgrades that are no longer available for the existing equipment; and

**WHEREAS**, the traditional keyed access to the Police Department offices is not in accordance with our security upgrades or the required 24 hour monitoring of access; and

**WHEREAS**, the FY 2017-2018 budget can be adjusted to accommodate this unforeseen expenditure and appropriate the previously approved Capital Improvements expense to cover a portion of this need, with the remainder, if needed, coming from the Materials and Supplies line item; and

**WHEREAS**, CPD staff has received quotes from three (3) access control providers; **Mid-State Security** (Grand Rapids) - \$5,764.59 (no monthly service agreement, but will charge mileage per service request), **EPS, Inc.** (Grand Rapids) - \$6420.00 (Monthly service agreement of \$60.00/mo. this goes up with expansion of additional doors), and **VidCom Solutions** (Lansing and the provider for other City owner facilities) - \$6,650.68 to \$7,150.68 (\$500.00 difference if they can use existing wiring); and

**WHEREAS**, VidCom Solutions offers a more local response without mileage and monthly service agreement charges and currently services City facilities, recommendation would be to enter into an agreement with VidCom Solutions for necessary access control upgrades.

**THEREFORE, BE IT RESOLVED** that the city council authorizes the purchase of the police department access control system from VidCom Solutions of Lansing in the maximum amount of \$7,150.68.
