RE: Amendment to approved Taco Bell Site Plan.

Dear Bryan Myrkle;

We would like to formally request an amendment to the approved Taco Bell Site Plan. A description of the revisions to the approved plans dated Nov. 30, 2018 are as follows:

1. The proposed outdoor concrete patio seating located along the Northwest building elevation has been removed. This change is due to recent revisions done to the typical Taco Bell building design per Taco Bell headquarters. We have increase the proposed building foundation landscape plantings. Additionally, we have proposed an additional three (3) evergreen trees to be located along the Southeast curbline, parallel to the loading zone area per Charlotte Planning Commission regular meeting held on Jan. 08, 2019.
2. A revision to the proposed oil Bulk Tank collector located within the dumpster enclosure has been made. Several difficulties due to spillage, collection and maintenance have been observed in the past for the metal "SLIM ST-1250" cooking oil tank. A new Bulk Tank is being proposed for all new Taco Bell constructions to address existing issues. A copy of the new oil Bulk Tank has been attached with this letter for your reference.

Please find enclosed the following documentation for your use:

- Four (4) sets of 24" X 36" revised sheets for the approved Plans.
- One (1) copy of the new proposed oil Bulk Tank collector.

If you have any questions or should you require any additional information and/or documentation, please contact us at your convenience.

Respectfully  
DESINE INC.

A handwritten signature in blue ink that reads "James M. Barnwell". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.

## Standard Bulk Tank

The Bulk Tank is our standard recycling container (grease dumpster) designed for foodservice operations every-where. This durable, leak-proof container is available in a variety of sizes and has an easy to raise lid that makes content disposal readily accessible. The protective screen ensures that only used cooking oil is being poured into your outdoor container. The special safety barrier construction protects your employees from the dangers of hot oil.

### Product Specifications:

Dimensions:

60" W x 43" D x 36" H (large)

Capacity:

2,000 lbs. (large)
