Good morning!

I read through the Parks Plan this morning and I'm excited to see what is slotted for Charlotte in the next 5 years. I was wondering if the data from the parks survey would also be released. I think that would be really interesting and helpful when making any suggestions for the park plan. Because there may be things I don't classify as a top priority, but maybe this is based on the data you collected from the community.

If not, that's just fine! Again, I think it's a good overview of the parks and what needs to be done to make them great outdoor recreation areas for Charlotte.
