Hello,

I have learned that the City Manager has proposed the closure of the Charlotte Area Recycling Authority to City Council.

Caring for our planet is important to me.

I do what little I can and take the time to recycle.

I know my efforts are worthwhile because the end destination of the materials I bring in to CARA is already known. I know they are truly being recycled instead of simply going to a landfill.

I am proud that our community is an example of what a recycling center should be.

Please keep this outstanding resource in our community and let it remain a model for what other recycling facilities should strive for.

Thank you for your consideration,

Lisa Starr
