**RE: Marihuana Facilities Licensing Act (MFLA)**

To Whom It May Concern:

Pursuant to the Marihuana Facilities Licensing Act (MFLA), MCL 333.27101 et seq, we represent a client who is interested in obtaining a provisioning center license. According to the MFLA in order for an entity to obtain a provisioning center license from the state of Michigan, the local municipality must have an ordinance in place to authorize the operation of provisioning centers under the MFLA. Other cities and townships are currently drafting ordinances. By allowing for provision centers in your municipality you will receive a share of revenues generated from the retail sale of medical marihuana.

Our client owns a successful business in the construction/manufacturing industry. They are very eager to work with the appropriate board to further this process. My firm can also help by providing sample ordinances in addition to being able to draft an ordinance to your specific concerns. If we would be able to present our client to your council and provide a presentation to you about why adopting an ordinance would be beneficial to your city/township, please feel free to contact the Nichols Law Firm at 517-432-9000.

Thank you for your time.

Very truly yours,

**THE NICHOLS LAW FIRM, PLLC**
